Foundation Updates:

- Egatha has continued to aid the KZ dispensary. At least 80 endocrinology consultations have been provided. In addition, Egatha has sponsored adult internal medicine and infectious diseases consultations once or twice each week.
- Egatha has covered paramedical tests (mainly laboratory) requested for patients.
- Egatha has covered the cost of any drug or paramedical item prescribed to our patients when they were not available in the KZ dispensary.
- A plan to refer patients in need for neurology, gastroenterology, and ENT private consultations with Egatha reducible consultation fees is currently being discussed among those in charge of the KZ dispensary.
- Members of our Lebanon Team have carried out home visits to 10 impoverished medical patients who live near the Beirut port explosion site. 3 months of medication were covered for these patients.
- Members of our Lebanon Team have also carried out home visits to identify those eligible for future full outpatient medical coverage.
- Egatha has launched a small project in Bekaa Mohafazat. This operation aims to support impoverished patients' emergency room care and discharge bills up to 6,000,000 LBP per month.
- In the city of Tyr in southern Lebanon, Egatha has begun to collect data on patients with chronic diseases. Egatha aims to identify those most vulnerable and include them in our target population and monthly medical coverage sponsorship.

Who We Have Helped

"I'm John T., an unemployed man with no income suffering from uncontrolled diabetes and peripheral vascular disease admitted for severe necrotic diabetic foot infection which required below knee amputation. Upon discharge I had to pay 700,000 LBP which was covered by Egatha. Also, The endocrinologist asked me to check my blood sugar at home but when I couldn't find in the pharmacies the strips needed for my blood sugar testing machine, Egatha bought for me a new machine with its compatible strips. Thank you Egatha."

"I'm Mark M. who had suffered an acute heart problem during a private clinic visit. Over several hours my consultant doctor failed to get approval for my transfer to a governmental or private hospital until Egatha doctor took under Egatha responsibility the coverage up to 3,000,000 LBP for emergency investigation and care. Upon arrival I was diagnosed with acute myocardial infarction and was sent for urgent coronarography during which a stent was put in place. Thanks to Egatha my life was saved."
